However, the Government has since lifted the ban on export of Cement and Clinker.

The production of clinker for the period under review was 1.75 million tons as against 1.95 million tons in the corresponding 18 months period ended 30th September 2007. (Previous year 12 months ended 31st March, 2007 - 1.34 million tons). Rehabilitation Scheme

Members may recall that the Company's net worth had been fully eroded and it was registered with Board of Industrial and Financial Reconstruction (BIFR) as required under the provisions of the Sick Industrial Companies (Special Provisions) Act 1985. The Rehabilitation Scheme was sanctioned for Company's revival during the year (hereinafter referred as "SS-02"). The scheme envisaged construction of a Jetty with mechanised loading and unloading facilities near the factory to reduce transportation cost, acquisition and setting up of D.G. Sets to reduce cost of power and granting necessary relief and concessions from the Banks/Financial Institutions & Government of Gujarat, equity infusion to be arranged by the promoter group and grant of additional financial assistance by Banks and Financial Institutions.

While the Revival Scheme sanctioned by the Appellate Authority for Industrial & Financial Reconstruction (AAIFR) in November, 2002 is under implementation, the modification in the sanctioned scheme (SS) has become inevitable as the Company could not implement the cost saving project as envisaged in the said SS due to the decision of the secured lenders not to disburse the fresh funds to the company as long as the litigation initiated by the Government of Gujarat against the said SS was not resolved. In the meanwhile, most of secured lenders desired One Time Settlement (OTS) of their outstanding dues. The Board for Industrial & Financial Reconstruction (BIFR) had circulated / published the Modified Draft of Revival Scheme (MDRS) in September, 2008 and suggestions / objections received thereto were considered at the hearing held in October, 2008. Considering that the world economy is facing its worst downturn since 1930s when it contracted amid great depression and that it is battering even emerging economies, the Company is now constrained to downsize its said MDRS. Accordingly, the Board of Directors proposed to submit the modification in SS involving reorganisation of existing share capital in the shape of de-rating of the shares and allotment of additional shares on preferential basis. The Company is pursuing its case with BIFR for obtaining its approval to need based modifications in SS-02.

Public Deposits

The Company has not invited and/or accepted any deposits, during the year.

MANAGEMENT DISCUSSIONS & ANALYSIS REPORT

Industry Structure & Development

The extended financial year ended on 30th September 2008 was closed under challenging circumstances. Rising level of inflation resulted in the intervention of the Central Government to control the prices, despite steep escalation in the input costs and taxes. On one side, the Government stipulated ban on export of cement and on the other side, allowed import of cement free of custom duty and CVD. However, the Government partially lifted the ban on export of cement from the State of Gujarat effective end June 2008 and from December 2008 onwards, allowed export of cement and clinker from India. The Government has now also levied CVD on import of cement.

India is the second largest producer of cement in the world with a capacity of 206 million tons as on December 2008. In view of the strong growth in demand consequent to GDP growth, the Industry planned to increase the capacity out of which, 38 million tons has already been installed by December 2008. The Industry produces cement at 90% capacity utilization during the period under review. The per capita consumption of cement in India at 135 kg is significantly low as compared to other developing countries.

Gujarat State has an installed capacity of about 19 million tons and has seen a healthy growth in cement consumption. The cement industry in Gujarat is the largest exporter of cement in the country.

The infrastructure needs for road, irrigation, ports and housing are expected to fuel growth in construction and cement consumption

Future Outlook

Given the overall economic growth, thrust on infrastructure development and Government's thrust on housing construction, the long-term outlook of Cement Industry looks stable and expected to grow in line with the GDP growth. It is expected that new capacity shall be installed in line with the growth in demand. However, the short-term imbalance of demand and supply of cement is inevitable when the new capacities come on stream.

Opportunities & Threats

The Governments emphasis on infrastructure spending and the housing needs of the growing population will ensure growth in consumption of cement. Gujarat state in particular has been attracting large investments in Industry, which will help the overall economic growth and therefore increased cement consumption. The Global economic meltdown, in particular the real estate and infrastructure projects in the Middle East can affect the export markets of your company. Therefore, newer markets are being explored to protect our plant utilization. Capacity additions in the region can also result in temporary surplus of cement production over demand thereby adversely affecting capacity utilization. However, expected strong demand in view of the expected high GDP growth, shall ensure absorption of large cement production capacities. The rationalization of taxes by the Government shall further ensure growth of the industry.

Cement being an energy intensive industry, needs quality power and fuel on sustained basis and at economic price. There has been a decline in the availability of linkage coal and increase of imported coal and auction coal resulting in high cost of fuel. In order to arrest the power cost, the Industry is continuously investing in setting up of captive power plants to optimize its cost. Your company has also installed captive power plant by installation of 6 nos. of 5 MW each DG sets. However, the company could not derive the benefit due to high cost of furnace oil prevailing during the period under review. Now, due to reduction in the international oil prices, the viability of the DG sets has improved and your company is now started running the DG sets for its power requirement.

Global Economic Situation

In view of the recessionary trends around the globe and specially some of the countries where your company exports its products, there is a down turn. Your Company has chalked out its strategy to find an alternate market and efforts to reduce the cost of manufacture, transportation and other overheads. These efforts are expected to help your company to partly off set the tight economic conditions in the recessionary environment.

Segment Review and Analysis

It is a single product company.

Risks and concerns

Government's policy for taxes on cement and major input costs would directly impact cost of sales and would remain a risk for the cement industry. The regional imbalance in supply and demand due to increase in capacities in the area where the raw material is available coupled with inadequate infrastructure to transport the cement at economical price needs to be addressed as a great concern.

Internal Control Systems and their adequacy

Your company has adequate internal control system and procedures commensurate with the size of its operation and nature of its business. The independent Internal Auditors continuously reviews the adequacy and effectiveness of the internal control systems on the on-going operations of the company, which provides reasonable assurance of adequacy and effectiveness, control, governance and risk management procedures to the Audit Committee. The recommendations of the Internal Auditors and the Audit Committee are followed up effectively for implementation. Following objectives of the internal audit is forming part of the audit plan as approved by the Audit Committee.

- Adherence to the operating system and manual.
- Performance of operating activities in efficient and effective manner.
- Compliance with the risk management procedures.
- Compliance with the legislative and regulatory provisions.

The Audit Committee reviews the audit reports and also hold discussions with the Statutory Auditors.

Human Resource Development / Industrial Relations

The Company continues to maintain constructive relationship with its employees with a positive environment so as to improve efficiency. The Company continues to invest in upgrading the knowledge and skills of the employees. The Industrial relations at the plant were cordial. Schemes like performance linked incentives and other benefits have been introduced.

The Company has subscribed to the code of affirmative action for SC / ST as the Company believes that equal opportunity for all sections of the society is component for growth and competitiveness.

The Management places on record the contribution of employees at all levels during the year and their whole-hearted co-operation, which has resulted in improved results.

The Company had 448 permanent employees as on 30.9.2008.

Corporate Social Responsibility (CSR)

The Company continuously carries afforestation at the plant site to improve the environment. During the year further new saplings were planted at the company's plant as a continuous drive to have greenery and maintain ecological balance. Besides, the Company supports other educational, social and philanthropic causes for society at large.
